

Night Stalkers

MINI LED NIGHT KIT

Installation:

1. Start by installing the tail LED (longest lead) by securing the LED appx. 1" away from the tailbox with one of the included cable ties. Bend and point the LED towards the tail at roughly 45 degrees.

You may way to play with this to get it how you like it.

2. Run the wires towards the front of the helicopter by securing along boom, boom supports and frame as needed.

3. Mount the front LED (short lead) above the battery and point it forward.

4. Excess wire can be tucked away and under Velcro strap used to secure battery.

5. Connect LED kit by inserting pins on connector into the flight battery connector (rear side). Match + and -

Make sure when installing the LED Kit to have plenty of clearance between the tail blades and LED!!!
